

Resume – Fabien Molinet

fabien.molinet@gmail.com

Cell: +33 7 60 77 02 44

Software development is a passion, I love being challenged and value different opinions: there is always something to learn from others. Currently based in Leymen, France near the German and Swiss borders.

Last degree: Bachelor of Computer Science, University Robert Schuman, France
English: fluent, French: mother tongue, German: conversational

Fabien Molinet

5, rue des Myosotis
68220 Leymen, France

Medgate – Technical Team Lead

since June 2023 in Basel, Switzerland

- Led a greenfield initiative to unify two legacy products into a single cloud-native solution on Azure, leveraging a distributed architecture for data residency, scalability, and performance.
- Managed and mentored a team of 9 offshore developers in Vietnam (for 6 months also managed two teams – 12 devs)
- Drove key technical decisions and proactively introduced innovative solutions to optimize architecture and workflow.
- Drove technical decisions, promoted innovation, and enforced high quality through tests, code reviews and plenty of CI checks.
- Collaborated with business stakeholders to simplify requirements, improving maintainability and user experience.

Technologies: .NET9, EF.Core 9, ASP.NET Core 9, TypeScript, React 18, Relay, HotChocolate
Azure : AKS, ServiceBus, Monitor, AI Search, OpenAI, SQL databases, ...

UBS – Lead software engineer

June 2018 – May 2023, Switzerland

Lead software engineer & DevOps Engineer, UBS (Jun 2018 – Oct 2020):

- Led technical ownership and reengineering of portfolio remediation software for wholesalers.
- Introduced innovative configuration solutions and automated DevOps processes using IaC and pipelines.
- Trained team on best practices and modernized software for scalability and testability.

IT Application Architect, UBS (Oct 2020 – Nov 2022):

- Led Robotics Process Automation development team – the platform runs thousands of robots
- Migrated monolithic platform to distributed, cloud-native architecture using Kubernetes, containers, message queues.
- Drove strong quality standards: decoupled code, introduced code reviews, automated testing, CI/CD, and code scans.
- Implemented Agile, managed backlog, and enabled rapid, feedback-driven releases.

Product Specialist, UBS Asset Management (Dec 2022 – May 2023):

- Defined APIs with OpenAPI 3, enabling direct integration for internal and external stakeholders.
- Developed data-driven solutions for order derivation and trend analysis; produced technical documentation and user stories.

Technologies: .NET6, ASP.NET Core 6, EF.Core 6, PowerShell7, Terraform, shell scripts, AutomationAnywhere 11 and 360, Citrix cloud...
Azure: AKS, APIM, ServiceBus, Automation account, Application Insights/Monitor, SQL Managed instance, CosmosDB ...

GE Healthcare - Senior software engineer

July 2016 – May 2018 in Freiburg, Germany

- Led development of core components of Centricity Cardio Workflow (CCW) to simplify physicians' work (.NET, WPF, WCF, EF)
- Refactored the whole unit test suite to move away from MSTest v1 and Fakes. Much faster builds and simplified development experience. Developed custom tools with Roslyn and VS extensions to support the transition.
- Proposed and implemented innovative features, e.g., a global search and a formula engine, enhancing product functionality and UX
- Trained team members to latest features, and pushed to move on newer stacks
- Won hackaton project using React/Redux, SignalR, .NET Core, ASP.NET Core, Dapper

- Developed cross-platform mobile apps (Xamarin/.NET) and backends integrating SAP, CRM, Exchange, and SharePoint, ensuring secure, real-time access to business data for global sales teams.
- Offline Product Catalog: Delivered a country-specific, offline product catalog with fast search and minimal app size, boosting sales productivity and customer engagement.
- Team Leadership & Agile Delivery: Led on-site and offshore teams using SCRUM, streamlining development and accelerating releases through CI, automated testing, and MDM deployment.
- SAP–CRM Integration: Enabled seamless SAP–CRM data exchange, improving workflow efficiency and data reliability for business users.
- Geographical Reporting: Built mapping tools that made sales tour planning 10x faster, supporting market growth.
- Responsive CRM Platform: Designed a unified CRM web app for all devices, enhancing access to customer data and tools.

Impact: Improved sales agility, operational efficiency, and digital experience for Hager Group's global workforce and customers.

FIS - Senior software engineer

June 2010 – April 2011 in Christchurch, New Zealand

- Proposed many ideas to improve Ambit Asset Finance that were implemented in the product (.NET, T-SQL, PL-SQL)
- Reworked core parts to rely on generics, interfaces and co-variance and performed many performance optimizations
- UI improvements, like automatic exception handling from business logic to UI using lambda expressions, reflection and controls

T&S – Software consultancy

August 2008 – May 2010, France

Worked for the following customers: Credit Mutuel Group, Hager Group, De Dietrich, Clestra, Capsugel and Knauf.

At Lonza (Capsugel) wrote code to interact with factory devices: scales, spectrograph, ...

Different software development tasks: CTI/Telephony applications, CRM applications, interacted with factory ERP (Protean), OCR documents, designed reports/dashboards and performance improvements.

Technologies: C#, COM Interop, VSTO, ASP.NET, Web services, Javascript, multi-threading, PL/SQL, T-SQL, Reporting, serial link/NPort

Bull – Analyst/Integrator for the Council of Europe (CoE)

August 2007 – August 2008 in Strasbourg, France

Developed and audited web applications (C#, ASP.NET, JavaScript, T-SQL). Integrated .NET, Java, and Cocoon apps across Windows and Linux (MSBuild, Ant, Maven). Recreated CoE test environments on VMs (Active Directory, mail server, batch, T-SQL).

Perinfo – Software engineer

September 2005 – July 2007 in Strasbourg, France

Migrated software to a 3-tier architecture and developed several .NET web applications & web services. Implemented dynamic PDF/CSV generation (J2EE servlet, XSL/FO) and optimized system performance.

Hobbies

Avid traveler who enjoys exploring new cultures, hiking, and camping in the wild, as well as cycling.

Open source

Some of my contributions are on GitHub:

- [ConfigurationSubstitutor](#): allows configuration substitution for .NET similar to what Azure DevOps offers with \$()
- [MongoDB.Thin](#): thin wrapper on top of MongoDB driver that simplifies data access
- [FFImageLoading](#): no longer alive - popular Xamarin library to load images quickly & easily (~ 1400 stars on GitHub/350 forks)
- [KickMsTest](#) & [Sig2Moq](#): Roslyn based tools to remove MSTest Stubs in favor of Moq (mocking framework)
- [ManageSleep](#): manage device sleep for all platforms targeted by Xamarin
